LISA'S LESSON

Zillow has never been inside your house.

So how can it know what your home is worth? The Zestimate comes from a computer. It can't see your new roof. It can't see your old kitchen. So it can be too high. Or too low.

A computer can't tell this kitchen from a 1985 one. A buyer can.

Here's how I find the real number:

1. I pull homes near you that **sold**. Not just listed. Sold.
2. I look at the inside photos of each one.
3. I hold them up next to your house. Roof, kitchen, baths, pool.

That side-by-side shows what your home is worth. You don't have to be ready to sell. But it helps to know your number.

HOME TIP · FIRE PREVENTION WEEK, OCT 4 TO 10

Charge it on a hard surface.

This year's focus is safe charging. Use the charger that came with your device. Charge on a table, not a bed or couch. Unplug when it's full. More tips →

BEHIND THE BRAND

Every home I sell gives back.

I helped start WAYS for Life. It supports teens and young adults aging out of foster care or experiencing homelessness. Every time I sell a home, I donate part of my income, in my name and in my client's name.
